CITY OF REDDING
Ron DeMaagd, Construction Manager
Don Chilton, Project Coordinator
Office: 530-225-4170

CONTRACTOR
TULLIS, INC.
Chris Handley, Project Manager
Office: 530-241-5105

PROJECT DESCRIPTION:
The City of Redding has contracted with Tullis, Inc., in the amount of $576,869 to reconstruct the intersection and road approaches of Old Oregon Trail/Oasis Road/Akrich Street. The project involves improving sight distance for vehicles, providing warning of oncoming traffic, and increasing turn-pocket storage.

The intersection will be raised about three feet, the roadway widened, flashing lights will be installed on stop signs, guardrail replaced, and the roadway completely reconstructed.

In order to perform this work, the intersection will be closed for 10 days starting the evening of July 11 and re-opened by 6 am on July 21. Message boards will be in place to alert motorists of the closure in advance. The contractor will maintain access at all times for local residents within the job limits and emergency vehicles. Motorists should allow for about a 15 minute delay while using alternate routes.

PROJECT FUNDING:
Funding for this project is being provided by both Federal and Local sources. The Federal Highway Safety Improvement Program (HSIP) will provide 90 percent of the project funding and the remaining 10 percent will be provided by Citywide Transportation Development Impact (TIF) fees. A small asphalt concrete overlay section will be funded from the Street Maintenance Fund (state gas tax).

PROJECT SCHEDULE:
Construction activity will begin on June 30th with placement of message signs, the complete road closure will begin the night of July 11, the road will be re-opened by July 21 and project completion by July 31.
